

Challenge #5: Implementation of head tags

The snapshot of my code, implementing what I learned about head tags on w3school. It includes meta, title, link, style, and script.

```
3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title>Challenge #5</title>
7    <link rel="icon" href="/favicon.ico" type="image/x-icon">
8    <style>
9      * {
10        margin: 0;
11        padding: 0;
12        font-family: Arial, Helvetica, sans-serif;
13      }
14      body {
15        background-color: black;
16        color: white;
17        font-size: 20px;
18      }
19    </style>
20    <script>
21      console.log("Hello 1-BSCS-A!");
22    </script>
23  </head>
```
